

Project Manager (Krakow, PL)

About Social Bicycles

Social Bicycles builds the next generation of urban mobility: bicycle sharing programs that are smarter, cheaper, and faster to deploy than our competitors. Instead of using 'smart docks', Social Bicycles builds 'smart bicycles' with onboard connectivity and an integrated locking system. Our team of mechanical engineers, electrical engineers, industrial designers, and software engineers produces every aspect of our industry-leading bike share platform inhouse. Social Bicycles is expanding rapidly, with 20+ programs across North America, Europe, and Australia. We place tremendous value on our Company's culture: a precisely refined mix of ingenuity, controlled chaos, hard work, and sense of purpose. All candidates should have the experience, competence, and enthusiasm to dive in headfirst and solve complicated problems. This job opportunity offers a unique chance to join a small team and make a big impact

About The Job

Social Bicycles is seeking a highly motivated and independent Project Manager to join our Krakow office and work with our European clients, including Krakow's new public bike share program.

Responsibilities

- Manage implementation and maintenance of Social Bicycles bike share systems in European markets.
- Provide day-to-day support to clients.
- Coordinate with various stakeholders (clients, cities, internal, partners, suppliers).
- Perform basic bicycle maintenance.
- Manage replacement parts process.
- Test Social Bicycles products (software and hardware).
- Ensure contractual obligations are met or exceeded.
- Participate in various internal projects.

Qualifications

- 2 years of experience in project management and/or customer relations.
- Bicycle maintenance skills.
- Driver's license.
- Good communication skills.
- Good computer skills.
- Good English.
- Proactive, organized, responsible.
- Interest in bicycles and/or transportation is a plus.
